Full-Stack Software Engineer with practical experience across the full development lifecycle. Strong foundation in building scalable, maintainable systems and collaborating within agile teams. Driven to advance into a Software Architect role, leveraging cross-stack expertise to design robust, high-impact enterprise solutions.

EDUCATION

WORK EXPERIENCE

05/2026 - Now

Software Engineer | CEH Technology Platform Joint Stock Company

Project: GTOS - My Thuy International Port Operating System (MTIP)

Role: Software Engineer (05/2026 - Present)

Tech Stack: Node.js, Express.js, Knex.js, MSSQL, EJS, TailwindCSS, jQuery, RESTful APIs.

Key Responsibilities & Achievements:

- Contributed to core modules of Port Terminal Operating System (TOS), including Berth Planning, Cargo Operations, and Contract/Tariff Billing.
- Developed the interactive "BA Map" (Berth Allocation Map): A 2D spatial-temporal planning chart that visualizes vessel visits along 1,200m+ berth lines with real-time ETA/ETB/ETD schedules.
- Implemented the "Booking Allocation" engine to map commercial cargo pre-bookings to scheduled voyages, seamlessly synchronizing operational data to service orders.
- Designed modular billing & contract services supporting multi-tier port tariff calculations (GT, HP, Metric Ton, TEU) and automatic discount rules.
- Refactored backend controllers into independent modular architectures, ensuring high code maintainability and 0% regression across legacy subsystems.

02/2025 - 05/2025

Full Stack Developer | CEH Technology Platform Joint Stock Company

- **Frontend (NextJS)**: Supported the development of a banking interface integrated with BIDV.
- **Backend (Node.js, PostgreSQL)**: Contributed to the **SmartGate - Hai Phong Seaport** project, building and maintaining an automation system for container gate-in/gate-out operations using OCR camera technology.
- Assisted in maintaining and improving system modules to enhance performance and reliability.
- Collaborated with team members and directly engaged with clients to clarify requirements, troubleshoot issues, and ensure project progress.

CERTIFICATE

User Experience Research and Design

09/2025

University of Michigan

[View certificate](#)

- Understand the basics of UX design and UX research
- Use appropriate UX research approaches to inform design decisions
- Design a complete product, taking it from an initial concept to an interactive prototype

Project Management Principles and Practices

06/2025

University of California, Irvine

[View certificate](#)

- Learned to define project scope, build WBS, create budgets, and manage project risks.
- Practiced cost estimation, scheduling, and milestone tracking for effective project delivery.
- Developed skills in change control, conflict

HIGHLIGHT PROJECT

06/2026 - Now

Domious Investor VN

Developed a quantitative trading and portfolio management system integrated with **TCBS API**, featuring:

- Real-time margin risk monitoring and safety ratio tracking.
- Smart money flow analysis (BSA) to detect unusual block trades and institutional activities.
- Automated trading bot for stock and derivatives orders using Python and FastAPI.
- Database management with PostgreSQL and Redis for performance and reliability.
- Deployment with Docker for scalable and maintainable infrastructure.

Role

Full-Stack Developer (Backend + Trading Engine)

Team Size

Solo project

05/2026 - Now

Global OSINT Core

Description

Built a real-time OSINT (Open Source Intelligence) news aggregation system using **FastAPI, WebSockets, PostgreSQL, Redis, and Docker**.

- Developed services to automatically crawl RSS feeds from major Vietnamese news outlets every 60 seconds.
- Implemented WebSocket broadcasting to deliver live updates to clients.
- Designed database schema and optimized queries for keyword/category/tag search.
- Integrated Redis Pub/Sub for efficient real-time communication between services.
- Deployed the system with Docker Compose and Nginx Gateway.
- Planned future enhancements including NLP-based classification, dashboard visualization, and alerting via email/Slack.

Role

Full-Stack Developer (Backend + System Integration)

Team Size

Solo project

management, and project performance evaluation.

Fundamentals of UI/UX Design

03/2025

Microsoft

[View certificate](#) 

- Conducted **user research** to inform design decisions.
- Applied **design thinking and human-centered design** methodologies.
- Created **wireframes, prototypes, and information architecture** to support UX strategy.
- Delivered **intuitive and user-focused UI/UX designs** through iterative testing.

Software Development Lifecycle

01/2024

University of Minnesota

[View certificate](#) 

- Analyzed software development processes from **traditional, secure, agile, and lean** philosophies.
- Applied **Scrum, Kanban, and user story** techniques to manage and optimize workflows.
- Practiced **requirements analysis, OOD, software architecture, and design patterns** within SDLC.
- Enhanced knowledge of **SQA/SQC and UX design** to improve software quality and usability.

Web Design for Everybody: Basics of Web Development & Coding

09/2023

University of Michigan

[View certificate](#) 

- Built responsive web pages using **HTML, CSS3, JavaScript, and Bootstrap**.
- Applied **DOM manipulation** and event-driven programming for interactivity.
- Designed user-friendly, accessible, and cross-device interfaces following **WCAG** standards.

- Practiced **UI design, wireframing, and interactive design** for usability improvement.
